

AURA variLine™ is a modern, versatile line of luminaires that can be easily joined to produce continuous lines of illumination.

With a wide output range from 420 lumens per foot to 2400 lumens per foot, variLine is perfect for various applications including general ambient lighting, architectural accents, task lighting, or enhancing the mood and atmosphere of a space. AURA variLine can be installed in different ways, such as recessed, surface, suspended, or wall mounted.

Selectable lumen output and CCT allow for complete control of your lighting, and combining fixtures into runs or shapes creates unique and interesting installations. variLine is an elegant solution for indoor applications, including educational facilities, offices, hospitality venues, and more.

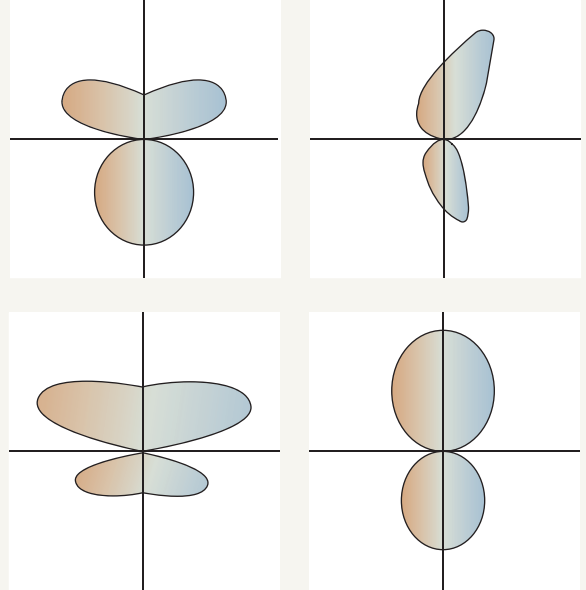

variLine™ linear

FEATURES

- 1.5", 2", 3", and 4" widths available
- 2', 3', 4', and 8' length options - join for continuous runs
- One-piece extruded aluminum housing, die-cast endcap
- 420 - 2400 lumens per foot
- Available in White, Black and Custom colors
- Input Voltage: 120-277V
- Standard 0-10V dimming, down to 1%
- Standard 2.5KV surge protection
- variTune™ switchable CCT: 3000K | 3500K | 4000K
- variLumen™ switchable output levels: 100% | 75% | 55%
- Lens option for Batwing and Wallwash
- Optional motion sensor
- Optional integrated battery backup
- Suspended, Recessed, Surface, and Wall mounting
- Illuminated Corners and Shape joiners
